### Section 4 – First Aid Measures

**General** – If irritation or other symptoms occur or persist from any route of exposure, remove the affected individual from the area, see a physician/get medical attention.

**First Aid – Skin Contact:** Remove contaminated clothing and wash contaminated skin with water.

**First Aid – Eye Contact:** Immediately flush eyes with copious amounts of water for at least 15 minutes, occasionally lifting upper and lower lids. Seek medical attention.

**First Aid – Inhalation:** Remove to fresh air. Seek medical attention if irritation persists.

**First Aid – Ingestion:** Do not induce vomiting, drink milk or water and immediately seek medical attention. Ingestion may irritate gastrointestinal tract.

**Protection of first aid responders:** Wear proper personal protective clothing and equipment.

## Section 5 – Fire Fighting Measures

- Extinguishing Media:** Not Applicable. Product will not burn.
- Unusual Fire & Explosion Hazards:** If exposed to temperature greater than 1400 °F, Aluminum sulfate will decompose generating toxic and corrosive gas.
- Special Firefighting Procedures:** Do not release runoff from fire control methods to sewers or waterways.

## Section 6 – Accidental Release Measures

- Spill/Leak Procedures:** Spill procedures are dictated by site wastewater flow controls and will vary from site to site. General procedures are provided in this document, but authorization for any wastewater discharge must be obtained prior to the discharge.
- Large and Small Spills:** Sweep and shovel up dry chemical and place in a covered container. Wash down residue with large amounts of water and neutralize with soda ash or lime if necessary. Aluminum sulfate solutions can have a pH less than two. The neutralization of aluminum sulfate can generate carbon dioxide. Adequate ventilation must be provided. Do not discharge wastewaters to the environment or a wastewater treatment plant without authorization from the appropriate officials.
- Containments:** Aluminum sulfate may absorb moisture and powders or crystals can solidify into a single mass. Protect aluminum sulfate from moisture.
- Cleanup:** Wash impacted areas with water to remove residues.
- Regulatory Requirements:** Follow applicable OSHA regulations (29 CFR 1910.120)

## Section 7 – Handling And Storage

- Precautions for safe handling:** Minimize and/or control dust while handling.
- Conditions for safe storage:** Store in a cool, dry place. Wet aluminum sulfate will corrode steel.

## Section 8 – Exposure Controls / Personal Protection

### Permissible Exposure Limits

Chemical Name	CAS Number	OSHA PEL	ACGIH TLV	NIOSH	Mexico

- Engineering Controls:** Exhaust fans may be necessary.
- Respiratory Protection:** In case of brief exposure or low pollution use respiratory filter device.
- Skin Protection:** Wear gloves and use hand creams to prevent dry skin.
- Eye Protection:** Wear proper eye protection; at minimum, safety glasses with side shields.
- General protective and hygienic measures:** Avoid contact with the eyes and skin.
